

Alcooli – Proprietăți chimice, utilizări

VI. Proprietăți chimice:

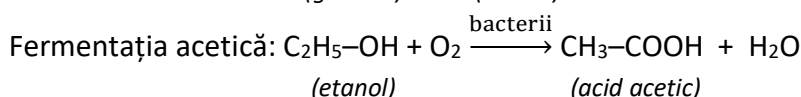

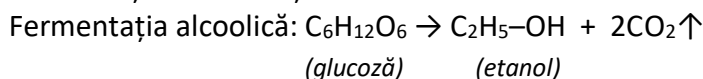

1) Arderea:

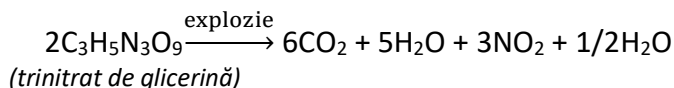

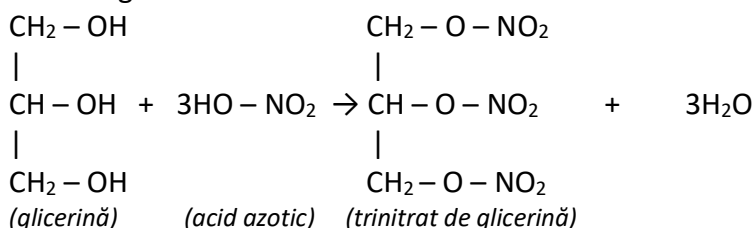

2) Oxidarea:

3) Fermentația alcoolică și acetică:

4) Nitrarea glicerinei:

VII. Utilizări:

Metanol: coloranți, rășini, solvent, combustibili, fibre sintetice, polimeri;

Etanol: spirt medicinal, băuturi alcoolice, solvent, medicină, farmacie, esențe, parfumuri, conservant, combustibili;

Glicerina: explozivi, cosmetică, medicină, farmacie, ind. pielăriei, ind. textilă, mase plastice, antigel.
